

Assumptions made (1B):

- A tour may have a combination of days in which it runs (e.g. "Monday and Friday"), as well as "Daily", "Weekdays" and single days.
- A cruise cannot have zero passengers
- After normalisation, `pass_principal_lang` appears in the passenger relation. However, it hasn't been marked as mandatory because not all passengers will go on a tour. The passengers that go on a tour will then be asked to fill in their language, otherwise regular cruise passengers will not need to fill in their main language.
